

## What's New 'Cliff Notes'

### IBX SmartView 2020.1

IBX SmartView 2020.1 release delivers a set of new features enhancing the IBX SmartView capabilities.

#### Smart Data Grids

This new feature allows users to filter, sort and export information from a data grid; enabling them to choose and view desired information in the order in which they would like to view them.

#### System Alerts

In this release, Alarms are called System Alerts. These are activated by the system to monitor the available assets of the data centers. They notify users of the corresponding asset details for the generated alerts.

#### Custom Alerts

In this release, Alerts are called Custom Alerts. These are activated by users to monitor the available assets of the data centers. They provide more information on the event conditions of data sections of the corresponding assets.

#### Maintenance

This feature gives details of assets undergoing maintenance. Information regarding assets presently undergoing maintenance can be obtained, with scripts detailing their steps of operation.
