

## What's New 'Cliff Notes'

### Equinix Precision Time 2021.6

Equinix Precision Time 2021.6 includes additional features that enhance the user experience, including a new traffic monitoring tool and an enhanced subscription creation process. Also, Equinix Precision Time service has been expanded to provide availability in Mexico and Columbia.

#### Connection Traffic Monitoring

This release provides service-level traffic statistics for Precision Time connections to help you determine the impact for each individual service. You can view graphs that chart the average and maximum inbound and outbound traffic. Up to three months of traffic history is available.

#### New Subscription Integration

With this release, you can now use the Precision Time portal to create new subscriptions attached to your billing accounts and supported countries. This streamlined process results in a faster, more efficient workflow, with no need to redirect or log in to another portal.

#### Precision Time in Mexico and Colombia

Equinix Precision Time services have expanded in the LATAM region. Now, Equinix Precision Time is available in Mexico and in Colombia, South America.
