

## What's New 'Cliff Notes'

### Managed Services Netherlands 2021.1

Managed Services Netherlands 2021.1 release delivers a set of new features enhancing the service capabilities in Netherlands.

#### RPO=0 Storage

In this release, RPO=0 Storage is introduced to the High Performance and Performance storage tiers in EBC Storage, Managed File, and Block Storage services. This enables synchronous data replication between 2 data centers, and offers storage availability of 99.995%.

#### EBC Availability

[EBC Availability](#) is introduced in this release for users to access self-service functionalities during disaster recovery. This service allows VM's to be replicated to a VDC in a second data center, and comes in four service levels with different replication intervals from 15 minutes to 24 hours.

#### End of Sale Archive tier

This release introduces Object Storage, and brings an end to the Archive Tier for Block and File Storage services. Existing users of this service can continue to use it until the end of their contract, with possible extensions.
