

## What's New 'Cliff Notes'

### IAM 2021.5

#### New IAM User Experience

Several user experience (UX) enhancements have been added:

- Role detail breadcrumbs now appear correctly on the Roles page.
- Improved resource hierarchy displays on the User Detail page; resources now collapse and expand in a hierarchy tree.
- When assigning users to a role, you now see only users that have not been assigned the role.
- Search enhancements, including partial name search for the Members and Roles page.
- Addition of the Primary Admin role. This new role includes the IAM, Org, and Project Admin roles. See [Roles](#).

**Note:** The Primary Admin role is automatically assigned to ECP Primary Admins during account creation and migration. See [Migration](#).

- Addition of status labels for Billing Accounts. The status labels are: Active, Pending Activation, and Not Ready.

#### Case Management

Equinix IAM provides enhanced Support options for users experiencing a technical issue in the Console. See [Support](#).
