

What's New 'Deep Dives'

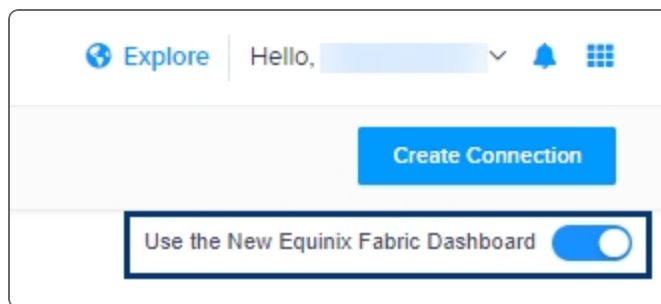

Equinix Fabric 2021.3

'Deep Dives' offer more detailed information on new and enhanced features for this release.

Health Dashboard

The Equinix Fabric Dashboard provides a single location to view all of your ports. The dashboard provides port utilization statistics as well as availability status.

When you log in to Equinix Fabric, click the toggle at the top of your browser to access the dashboard.

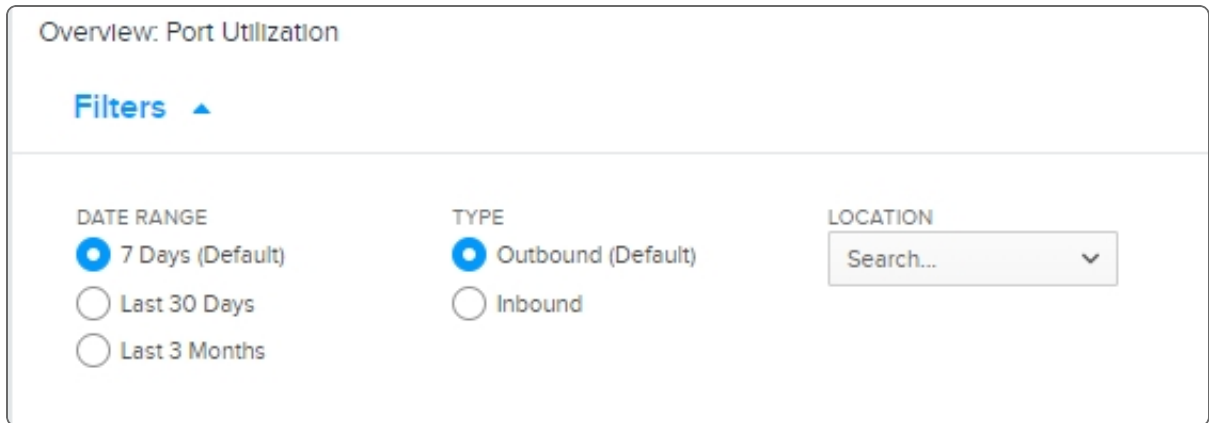

Port Utilization

Overview: Port Utilization provides a statistical overview of the top five utilized ports. By default, the data is sorted by the last 7 days and outbound traffic.

Click on any section of the pie chart to view the port name, location, number of connections, bandwidth, and a graph of the traffic for that port.

Use the **Filters** drop-down to change the parameters.

- **DATE RANGE** – View port data for the last **7 Days**, the **Last 30 days**, or the **Last 3 Months**.
- **TYPE** – View port data for **Inbound** or **Outbound** traffic.
- **LOCATION** – View port data for a specific location.

All Ports

Overview: All Ports shows a list of all your ports. Ports are sorted by port availability. Unavailable ports display at the top of the list, followed by unavailable LAG ports, and then available ports. Port status is indicated by the icon displayed next to the name, allowing you to easily determine port availability.

In addition to port status, the **Overview: All Ports** section also indicates:

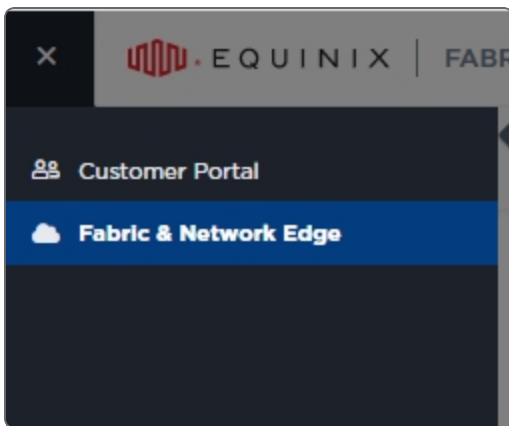

- **Port Name**
 - **Location**
 - **Outbound (Last Seven Days)** – Indicates the percentage of outbound traffic for the last 7 days.
 - **Inbound (Last Seven Days)** – Indicates the percentage of inbound traffic for the last 7 days.
 - **Total Bandwidth**
-

- **Allocated Bandwidth** – Indicates the percentage of bandwidth being used. A percentage over 100 indicates that the port is oversubscribed.
-

Portal Experience

The Equinix Customer Portal (ECP) and the Equinix Fabric portal are combined to create a centralized experience for Equinix customers to access all of their Equinix Fabric services.

After you log in to Equinix Fabric you can click the menu icon to view and navigate to other Equinix portals.

Note: Currently, only the ECP and the Equinix Fabric portal are available in the consolidated portal experience. More Equinix portals will be introduced in future releases.

Navigate Between Portals

1. Log in to the [Fabric Portal](#).
 2. Click the menu icon.
 3. Click the portal you want to access.
 4. Click  again to navigate to a different portal.
-

Discovery Home Page

The Discovery home page makes it easy for you to discover the services and companies available on Platform Equinix as well as connect to other Fabric customers.
