

## What's New 'Cliff Notes'

### Equinix Fabric 2022.4

This release includes the new Solution Builder feature, unlimited local connections for remote and remote metro ports, patch panel details available in the Ports Inventory.

Equinix Fabric 2022.4 is available August 8, 2022.

#### Solution Builder

Design your Interconnection solution with the Solution Builder. Drag and drop your Equinix Fabric and Network Edge connections into a solution diagram, then generate and download a cost estimate for your end-to-end solution. In the current phase of this feature, you can select a single network virtual device, a single port, and a single connection to a service provider. See [Solution Builder](#) for more information.

#### Unlimited Local Connections for Remote or Metro Remote Ports

You can now order remote or metro remote ports with unlimited local connections.

#### Customer Patch Panel Details

Your patch panel information is now available when viewing the Physical Port Details. In addition to seeing the Equinix Patch Panel number and ports, you will also see your patch panel number and ports. Go to your **Port Inventory** to view port details.
