

What's New 'Cliff Notes'

Marketplace 2022.1

Various quality-of-life enhancements have been made to Marketplace.

Equinix Precision Time and Equinix Metal available as products in Equinix Explorer

In the product availability chart, Equinix Precision Time and Equinix Metal are now displayed as possible products.

- Equinix Precision Time is available on the IBX level
- Equinix Metal is available on the Metro level

Company Profile Improvements

Search Icon and help text has been added to let users know that email address field is searchable. In Team Members, only users with editor rights will be able to see the different types of users (Active, Approved, Suspended, Terminated).

Improvements to Ecosystem and Interconnection Visualizer

Service categories with zero counts will not be displayed in UI and downloaded reports. By default, a Global View will be displayed to show all Ecosystem and Interconnection data based on all Equinix's locations. Select Services dropdown menu allows you to select the sub-categories within each service.

Fabric's Create Connection CTAs has been added to Provider Search.

After doing a search within Provider Search application, you (with the right permissions) will be able to get into Fabric's create connection flow by using the CTAs found in the Searched list of Provider Search.
