

What's New 'Cliff Notes'

Marketplace 2021.5

Equinix Marketplace 2021.5 provides synchronized profiles, improved search results, enhanced visibility, single sign-on support, Marketplace and ECP profile integration, and access to privacy preferences. Marketplace 2021.5 is available May 10, 2021.

Synchronized Profiles

Customers with accounts on both Equinix Marketplace and Equinix Fabric can now access and edit their company profile on either portal. Storefront features such as company overview, logo, contacts, and profile visibility are continuously synchronized across portals.

Improved Search Results

Customers with Marketplace Company Storefronts now appear in service provider search results under **Explore** in Equinix Fabric.

Enhanced Visibility

Equinix Fabric service profiles and location information appear on the Marketplace storefront for customers who participate publicly in Equinix Fabric. These Fabric profiles also show in Marketplace Service Provider search results.

Single Sign-On Support

Streamlined single-sign-on (SSO) is activated between Equinix Customer Portal (ECP), including ECP Mobile, and Marketplace for registered ECP users.

Marketplace and ECP Profile Integration

ECP users can view their user profile in Marketplace but are seamlessly taken to ECP to change settings, such as language preferences and more.

Access Privacy Preferences

Equinix users can update their privacy preferences and review the Equinix Privacy Statement by selecting **Review Privacy Settings** under user profile.
